GLADIOLUS **BILL'S BULBS BLOOM BEST** **GLADIOLUS**

Trade Mark

At show time all through the north central states a protracted drouth made us all down hearted with an inferior flower crop. Just about the time flowers were done rains came on to help produce a wonderful bulb crop. Harvesting conditions have been ideal and with the installation of a modern dryer our crop of bulbs is curing in the best of condition.

Every bulb in our thirty acre fields was treated before planting, which is a policy we expect to continue. Even though diseases are not present, a proper treatment serves to prevent the development of disease. The crop now in storage is the cleanest, healthiest, high crown stock of bulbs we have ever produced.

EXTRA BULBS FREE WITH FALL ORDERS

Although our immense new store house will hold our crop, we are going to repeat our last year's offer of extra bulbs on orders received this fall. Besides getting the extra bulbs with fall orders, you get the nicest stock before those you want are sold out.

BILL'S ORIGINATIONS

are so much better than previous years that I hardly know some of them. The four-acre Seedling Test Plot is a

BLAZE OF GLORY!

Knew I had some fine seedlings coming on but they are showing up beyond my expectations. Going to tell you on last page what I have decided to do with some of them.

SPECIAL NOTICE

We will reserve your order and make shipment next spring if you prefer. We advise spring shipments for safety from freezing.

Help us relieve the spring rush by getting your order in now and we will be pleased to send you the extra bulbs as indicated on next page.

Cordially,

GLADIOLUS BILL.

READ CAREFULLY

Large bulbs are 1 1/4-in. to 2 in. diameter. This is the size to produce first class flowers and are the ones the amateur should plant in his garden.

Medium size bulbs are from 3/4 in. to 1 1/4 in. in diameter. These will produce fair blooms at a saving in price and will also produce large bulbs for the following year. We are not offering medium bulbs for fall Orders except as priced in this list.

Small bulbs are 3/8 in. to 3/4 in. diameter. Not all of these will flower but part of them will. All should produce nice flowering bulbs in one season's growth. If you can wait a year

for the blooms, order this size. Small bulbs not available for fall Orders except as priced in this list.

HERE'S HOW YOU SAVE

By Sending Your Order with Cash Before January 1st, 1928, Not Later.

When you order 2 of a kind we will send you one extra bulb.

When you order a dozen of a kind we will send you 6 extra bulbs.

When you order 100 or more of a kind, we will send you 30 extra bulbs for each 100.

Sizes and quantities not priced are not available for fall Orders.

LIST OF VARIETIES

Refer to our 1927 Spring Catalog for descriptions. If you cannot locate your copy, ask us to send you another one.
